TASK AUTOMATION, WITH ACCOUNTABILITY!

CONSISTENCY = QUALITY

The backbone of every Quality program is consistency. Instruments need to be calibrated. Hourly production samples need to be pulled. Compliance paperwork needs to be submitted.

With Presage, these regular tasks can be set up and scheduled ahead of time to automatically prompt the right people to take action on a regular basis, whether that's telling the Quality Technician to go grab that sample, or reminding the Director of Compliance to submit that report.

Text and email alerts can be configured to provide reminders as deadlines approach, or to draw attention to overdue tasks that have not yet been completed.

Ensure regular tasks get completed, without becoming a managerial time-sink.
