MOBILE DATA ENTRY & ALERTS

Work moves fast on the manufacturing floor! Presage has a purpose-built simplified mobile interface for data entry to ensure your Quality Technicians and Production Operators can record data quickly and easily, and get back to the rest of their job. You don't want to miss a quality issue because you were head-down filling out paperwork!

Presage Mobile is quick to navigate, and can integrate with barcode scanners to further speed up data entry. Users get instant feedback on the acceptability of results, so they know right away if there is a problem. Instant follow-up actions can also be configured, to prompt a user to take corrective action if a value is out of spec.

Using Presage's text and email alerts, other stakeholders can also be informed of problems as they arise. Notifications are flexible, and can escalate as the severity of the problem escalates.

While we haven't quite mastered actually seeing the future, Presage ensures you know about issues as soon as they are recorded.
