## 1. User-Friendly Data Collection

Direct customization to your fields, and a separate simplified data entry interface help your team get trained and going on Presage right away, helping you also with any turnover events.

## 2. Food Safety Culture

Create a tech-forward internal culture that has good systems, communication and follow-up. Use a software that allows for reference information on tasks on “how-to” to ensure your team knows when they need to, simple data collection, and recurring tasks to ensure tasks get done on-time. Communication improves from weeks or days, to instantly with software.

## 3. Environmental Mapping

SQF, FSMA, and other compliance or regulatory schemes may require Environmental monitoring. Now you use a full-featured mapping solution, and see any problem areas, including trending any specific locations or data.

## 4. Lot Tracing and Production Batching

Presage allows you to use a tablet to enter batches, amounts, and ingredient lots, helping you trace through reporting any potential issues in seconds, not hours.

## 5. FSMA Electronic Recordkeeping Requirements

21 CFR 11 Electronic signature requirements built in for FSMA, including dual entry of password, managing password accounts and users, and change tracking.

## 6. FDA / USDA Reporting

Reports that can be generated for USDA or FDA custom to your operations to allow for sharing information to meet their exact requests.

## 7. Corporate Management

Centralized management of the software to create and manage checklists at either a local or corporate location. Checks can also be shared between plants.

## 8. Cross-Platform

Presage data collection can be run on Windows, Android, iOS, Chrome, or Edge, and adjusts to the size of the data collection window.

## 9. Automation of Checklists

Scheduling of tasks is available to any checklist, allowing you to create consistency of checklists across any area of your plant, including in multiple departments.

## 10. Integration

Presage has built integrations to other systems for a separate fee, if agreed by both parties on scheduling, including ERP systems like JDEwards.

## 11. Barcoding Tags and Scanning of Samples

Presage was built from the ground-up to work with scanning hardware on iOS devices, including 1D and 2D barcode scanning directly into the system, or creating custom actions to speed up and make your data entry more consistent.

## 12. Direct Observations

Your team can fill out a checklist directly after a check is performed to record that you directly observed the check being performed.

## 13. File Attachments and Picture Taking

Presage allows you to take pictures from mobile devices, and upload files from your desktop directly to the software for central review. Pictures are instantly available after taken and saved!

## 14. SQF SPC Requirements and Statistics

Presage can run statistical charts on any numeric data, including control charts. Data can also be tested by statistical rules as it's collected, and displayed on a refreshing dashboard.

## 15. Alerts and Notifications

Presage can currently alert management of any failed result or any items that are coming due. Alerts can be sent via email or text message.

## 16. WIFI

Presage devices can collect data on WIFI, Cellular or LAN networks. You can also open checklists and go to areas without WIFI to complete them, then return to WIFI and save the results.

## 17. Automated Calculations

Presage can automatically be used to calculate averages, minimums, and maximum values or other standard calculations (as you could do in Excel), within any checklist. No calculators required. This includes detailed calculations and formulae like Date Code tests.

## 18. Reports

Presage can run one-off or automate reports on your data of anything stored in the database, including adding thresholds, pictures, custom reports, statistics, and more! Pre-shipment reports, lot specific reports, reports on a specific date, time, or line are all available.

## 19. CAPA and Follow-Ups

Presage can track and follow-up activities after an initial value is recorded and even automatically generate a follow-up checklist that's custom to the non-conformance. Alerting and resolution allow you to get everything you need in one place.

## 20. Storage and Safety

Presage allows you to store data on your own network, or on a cloud-service that we maintain. The option is yours!

## 21. Ongoing Updates

Presage provides updates to all of our customers, including major new releases up-to 4 times per year. This prevents you from having to buy another system in 3-5 years, increasing ROI, and reducing overall cost of ownership.

## 22. Cross-Department Functionality

Checklists can be run across departments, including preventative maintenance, sanitation scheduling, pes management, production batches, lots, and expiration dates, and more.

## 23. LIMS

Presage allows you to track analyses and samples, including incubation times and barcode tagging. We've built it specific to a food production lab to help you out practically, and to prevent you from having to buy another system.

## 24. User Account Access

Users can have very specific user groups and permissions. Easily add new accounts and track all work in Presage with our system.

## 25. Data Storage

Presage doesn't charge any additional fee for data storage at this time.

## 26. Supplier Tracking

Store any risk assessments and expiration dates on any supplier documentation directly in the software.

## 27. Local Management, Remote Help

The Presage team gives you full training and access to be able to set-up the system the way that you would like and change any users, checklists, products, locations, and more! If you need our help, we're here to help!

## 28. Data Access and Sharing Between Plants

Your teams can collaborate and review results across their plants. Allowing regional managers or corporate to directly collaborate. Additionally, you can add permissions to prevent items from being changed.

## 29. Real-Time Data Review

Data can be searched down to the field and added to reports, graphs, statistical charts, or advanced graphs all in the same place, allowing you to instantly review.

### **30.** Auto-Refreshing, Individualized Dashboards

Dashboard can be set-up custom per user to review data on an ongoing basis, to allow your team to review it simply and easily. Follow-up by having automatic triggers on data that needs a response.

### **31.** Customization

Nearly everything in the software is custom to the frequency, type, and names of your checks, allowing you to tailor it to your needs exactly.

### **32.** Change Tracking of Fields

Changes in the software are tracked and reviewable by you right away. Allowing you to hit the change log tab and see what records were changed. Additionally changes are tracked and indicated by an icon.

### **33.** Compliance

Presage can help you run any data onto a report, helping you meet any compliance requirements, whether they be state, federal, local, or 3rd-party.

### **34.** Verification

Presage allows your team to review and sign-off on any set of checklists in the software, giving your team a sign-off that matches your requirements for paperwork reviewed.

### **35.** Improved Verification Alertness

In addition to having a sign-off capability with due dates, Presage can call to your attention non-conformances or unfilled out fields, helping your team respond sooner.

### **36.** Out-of-Specification Flags and Alerts

Information is available directly to technicians as an option to be toggled on or off to whether items are out of spec, with customization to the field, product, location and more. Icons change and colors are used to flag the technicians and automated alerts can be sent.

### **37.** Built-In Graphing and Advanced Graphing

Bar, line, pie charts and more are available in Presage allowing you to easily review your data in detail.

### **38.** Export to Excel

All data that you get from a search can be exported to Excel, allowing you to further manipulate it.

### **39.** Downtime Trending and Production Reports

Any data collected, including downtime, can be run onto reporting, allowing you to review it in graphs, charts, or reports.

## 40. Customer Support

Presage keeps you up-and-running with reliable server up-time, helping you to keep going 24/7. During emergencies or the work week: 8:30 AM to 5:00 PM we have live support to help you with what you need. Our support staff is engaged in new product features, and regular planning, keeping any issues that frustrate you top of mind to develop new or updated solutions for.

## 41. Hardware Kits

The Presage team can get you set-up with backpack kits for hardware devices to help you get scanned data, pictures, and more into your program, efficiently and effectively.

## 42. Efficient Remote and On-Site Implementation

We work with you on-site or remotely to effectively get you set-up, helping you get through the trial period with the right amount of on-site training and configuration, and maximizing the value of the implementation period.

## 43. Custom Reporting

Additional reporting is available to customize reports for you for a fee.

## 44. All-in-One Advantage

Presage provides all of its modules to our users. As your program grows, you can easily grow within the software, later adding new computer installations, mobile devices, or users.

## 45. No User Fees

Run 1, 2, or 3 shifts in Presage with no problem, and deal with turnover without managing billing through multiple different accounts. Why pay per user when you use Presage for as many users as you have?

## 46. Value-Driven Fee Structure

Presage charges by the computer workstation for the software licensing and often outfits entire plants for our base fee. It's cost effective and efficient. For mobile, one-time per unit fees allow you to add users as you need without bumping up your monthly fee.

## 47. Long-Term Thinking

Presage allows you to manage your software costs long-term by offering 3 year contracts with an extension year to keep the same pricing for up-to 4 years.

## 48. We want to help you!

We're genuinely here to help you build a better QA program! Your feedback matters, and we want to improve the software in ways that help you. We attended the most Food Safety conferences this year, and were out talking about technology everywhere we went.

## 49. Time Zones

Presage works effectively in every time zone, allowing you to run the software across your entire enterprise while maintaining data integrity.

## 50. Improved SOPs

Presage allows your team to review instructions on a per test basis - this means when your team is performing a specific test like pH - they can tap for more information and directly review the how-to perform pH check.

## 51. Environmental Mapping by Date

Your team can now send date-specific results to the mapping screen, and play through them! This allows you to see hot-spots or trouble-areas in real time.

## 52. Internal Presage Infrastructure Updated

Presage now offers the option to host your information on a remote cloud server, like Google Cloud, and we've updated our internal system to allow us to deliver web features more quickly. This means access to new technologies and tools that will improve the value of your on-going license and support fees.

## 53. Send to Report

From the start, we've known you'd want very custom filtering on your data. We've combined that easy-to-use, effective search functionality, with a new report, allowing you to be precise in your searches, and quick to generate a new report. We think you'll love it.

## 54. Version Control of Documents

Presage will have an on-the-nose document management system that's not for novel writers, but is for QA managers. We've now implemented the ability to store a version number of a document and tie it to a particular test, as well as the changes from the previous document.
